# ABOUT

## WE SIMPLIFY THE RENTAL SHOP'S JOB

Advanced Racking Systems customizes your storage needs to suit any space requirement while ensuring the utmost in workmanship and quality.

Our systems are some of the most energy-efficient and economical in the industry and require no special wiring by simply utilizing a standard 110 volt outlet.

All structures are built from quality solid steel with a baked-on powder coat finish resulting in a uniform, durable, high quality and attractive finish.

Ski & snowboard boots are dried and stored on the same rack, simplifying the rental shop's job of serving its valued customers.

The days of rotating inventory are long gone. Now, with just the flick of a switch, 100% of your inventory will be dry and ready to rent.

Winter resorts want beginner snowboarders and skiers to have the ultimate first experience which includes walking into an odour free room and stepping into a pair of dry and comfortable boots.

## HOW CAN WE MAXIMIZE YOUR INVENTORY?

No matter what your square footage, Advanced Racking will configure a tailored system that will work for your space. Whether it's a floor, caster or rail system, we can solve your inventory needs with our custom storage solutions. For example, we can mount units on the wall when floor space is at a premium. We can work with any space large or small to maximize your inventory potential.
